

SYSTEM AND METHOD OF VIRTUAL PRIVATE NETWORK
ROUTE TARGET FILTERING

ABSTRACT OF THE INVENTION

5 A system of route target filtering includes an import filter receiving a plurality of routes having a next hop routing information. The import filter accepts a first subset of the routes according to an import target policy. The system further includes a re-export filter also receiving the plurality of routes. The re-export filter modifies the next hop information of a second subset of the routes, and distributes the modified routes.
